

"WHAT DO WE KNOW ABOUT THE ADULTS OF OUR COMMUNITY?"

Mask Project created by 3rd Graders, Tracy Pendred, Teacher

This project includes a reading component, writing component and several arts integration pieces including portrait drawing, Andy Warhol information, pop color painting, plaster gauze work and color matching.

Reflection:

This particular project is powerful for both the students and the adults in our building. The students pursue biography research and writing with staff members leading to stronger relationships and compassion. The process and the results are shown in a beautiful documentation board in the hallway and over time, the entire school community becomes invested in the project. The more we all know about each other, the more we can respect and connect with one another.
